ABSTRACT

SUMMARISATION REPRESENTATION APPARATUS

At least one topic in text data is determined by a topic

5   determiner (4). A topic thread determiner (5) identifies

in the text data context data associated with the at

least one determined topic and provides topic

representation data defining a graphical representation

of the at least one topic in which are distributed visual

10   indicia representing at least some of the context data

with the distribution of the visual indicia indicating

the positions within the text of the corresponding

context data. The topic thread determiner (5) provides

the topic representation data for display to a user on

15   a display.
